

Situation vs Model COVID-19 in Germany

Week number (2020/21)

4 6 8 11 14 17 20 23 26 29 32 35 38 41 44

Week number (2020/21)

Figure 1 is a line graph showing the cumulative number of cases over time. The x-axis represents time from 0 to 300, and the y-axis represents the cumulative number of cases from 0.0 to 0.8. The legend indicates four data series: Confirmed cases (black circles), Recovered cases (green triangles), Deaths (red plus signs), and Modeled cases (black dashed line). The graph shows a sharp increase in confirmed cases starting around day 70, peaking around day 100, and then gradually declining. Recovered cases show a similar trend but at a lower level. Deaths remain very low throughout the period. The modeled cases line closely follows the confirmed cases line.
